| Red Velvet cake | Chocolate Mud Cake |
| Light and Fluffy | Rich |
| Red | Chocolate |
| Smooth texture | Tasty |

Here is a fun fact about cakes. The earliest cakes were actually flat and compact discs of grain which were dried and compacted together. Isn't that interesting!!!

A screenshot of a web browser window showing a form titled 'What is your name?:'. The form is set against a purple background. It includes input fields for 'What is your name?:' and 'How old are you?'. Below these is a section titled 'What is your favourite cake?' with a dropdown menu labeled 'Select your cake!'. Underneath the dropdown is a text box with the prompt 'True or False, to make a chocolate mud cake you need vanilla essence.' and two radio button options: 'True' and 'False'. At the bottom of the form is a text area with the placeholder 'Any further comments are appreciated!' and a 'Submit' button. The browser tabs and address bar are the same as in the first screenshot.

Reflection:

Today I have completed my first HTML Website. This website was themed around cakes! A HTML page was created and I covered html tags such as <table> <form> <link> <p> <body> <input> and also linked a css page in order to control the formatting aspects of the project. Overall I believe for my first website I did fantastic and am very happy with the results!

Thankyou for the task!
